

Satellite radio is an absolute boon to me.
Firstly the complete lack of advertising makes listening an absolute pleasure!
It is a refuge from the barrage of advertising on TV with its endless repeats,
junk mail and the ever increasing amount of spam!

The varied program for each station makes easy listening throughout the day -
without those repeated sequenecs so often found on commercial radio.

Perhaps the biggest boon, however, is that when travelling around the country, I
can listen to my favorite stations which I can't do with a normal radio.

Sound quality is excellent wherever I am and the variety of genres of music has
lead me to educate me to experince sounds that I have not heard before.

Please do not restrict Satellite radio!
